

Dear Sirs/Madams;

It has been brought to my attention that some of the points I made in my earlier comment to you were unfounded and were not factual at all.

For the record, the points to which I refer were about the 2 gentlepersons who originally filed the petition against Hi-Fi SSB. In my earlier comments, I suggested that they have themselves been cited for interference, whether incidentally or accidentally, and had received letters of warning from the FCC. This point was based solely on the information provided by users within the www.qrz.com forum. I wish to apologize for my haste in using this false information as part of my attempt to provide intelligent, precise information to withhold the amateur radio community's ability for exploration and experimentation therein.

Please review my earlier comments and these together, when attempting to resolve this particular issue. Thank you for your time and efforts in this matter.

Chris O. Sierra KC2KFW
